

Icon Portal

Icon Portal indeholder links til alle Notes databaser i Domino domænet. Databasen scanner regelmæssigt Domino serverne for nye databaser. Opdater Icon Portal en ny database, oprettes et ikon-dokument i Icon Portal.

Når brugerne skal finde en database, så kan de åbne Icon Portal som viser dem alle de databaser, som de har adgang til. Brugere kan åbne databasen ved at dobbeltklikke på ikondokumentet eller vælge knappen "Open" i handlingslinjen.

De kan desuden tilføje databasen til deres workspace i Lotus Notes.

The screenshot shows the Icon Portal interface. On the left is a navigation pane with categories: Applications (with sub-options: Select by server, Database name, Server & database, Category & database), Mail & Calendar (with sub-option: Database name), and Administration (with sub-option: Invisible databases). The main area displays a table of databases with the following columns: Open, Add bookmark, Add bookmark to workspace, Visibility, Server, and Path. The table lists various administrative tools and their paths.

Open	Add bookmark	Add bookmark to workspace	Visibility	Server	Path
				Administration Requests (R5)	
				DOC01/Servers/Sander Software	admin4.nsf
				Admin.Easy ACL Manager R6	
				DOC01/Servers/Sander Software	admineasylaeaccl.nsf
				Admin.Easy ACL Simple Tools	
				DOC01/Servers/Sander Software	admineasylaeacclsimple.nsf
				Admin.Easy Clean-up Tools	
				DOC01/Servers/Sander Software	admineasylaecleanuptools.nsf
				Admin.Easy Cluster Maintenance	
				DOC01/Servers/Sander Software	admineasylaecluster.nsf
				Admin.Easy Configuration	
				DOC01/Servers/Sander Software	admineasylconfig.nsf
				Admin.Easy Creator R6	
				DOC01/Servers/Sander Software	admineasylcreator.nsf
				Admin.Easy Floating Quota	
				DOC01/Servers/Sander Software	admineasylaequotatools.nsf
				Admin.Easy Group Creator R6	
				DOC01/Servers/Sander Software	admineasylae_group.nsf

Der er forskellige visningsmuligheder af databaserne, fx:

- Databaser efter server
- Databaser efter navn/titel
- Databaser efter server og navn/titel
- Databaser efter kategori og navn/titel
- Mail databaser

Administrator har mulighed for at markere nogle ikon-dokumenter som usynlige, hvis de ikke skal vises for brugerne. Dette kunne være databaser som har med systemadministration at gøre.

The screenshot shows the 'Icon Portal' interface. On the left, there is a sidebar with a tree view under 'Applications' containing 'Select by server', 'Database name', 'Server & database' (highlighted in blue), and 'Category & database'. The main area displays a table of database applications. At the top of the table are buttons: 'Open', 'Add bookmark', 'Add bookmark to workspace', and a 'Visibility' dropdown menu. Below the table header, there is a 'Remove from list**' button. The table lists several applications under the folder 'DOC01/Servers/Sander Software'. Each row has a checkbox in the first column, the application name in the second, and the file name in the third.

	Database	
	DOC01/Servers/Sander Software
